## 1. Qualitative Information on Quarterly Consolidated Financial Performance

## (1) Explanation of Results of Operations

During the first half of the fiscal year under review (overseas: January 1 to June 30, 2018; within Japan: April 1 to September 30, 2018), domestically the theme park business performed well, especially at Sanrio Puroland in Tama City, Tokyo, where the Marchen Theater's Kawaii Kabuki-Momotaro by the Hello Kitty Troup and the Fairyland Theater's new musical Memory Boys-Store Selling Memories, which performed from the end of June 2018, proved especially popular. In the product sales business, successive natural disasters caused by typhoons and earthquakes negatively affected customer numbers due to such factors as a reduction in overseas visitors to Japan and a suspension of store business in some areas. Overseas, in Asia royalty income from China, Hong Kong, and Macao was steady but results from Europe and the U.S. remained poor and we are continuing to take recovery measures.

As a result, although sales decreased only slightly, falling $0.1 \%$ year-on-year to 28.2 billion yen, operating profit fell $10.1 \%$ to 2.1 billion yen due to increases in the cost of sales and in selling, general and administrative expenses. Ordinary profit rose $2.5 \%$ to 2.7 billion yen, mainly due to recording a 0.2 billion yen gain on investments in partnership as non-operating profit, while net profit attributable to owners of parent fell $21.7 \%$ to 1.5 billion yen after accounting for the following: an extraordinary gain of 0.4 billion yen on sales of investment securities; an extraordinary loss of 0.4 billion yen on valuation of investment securities; expenses of 0.2 billion yen as business structure improvement expenses for restructuring the U.S. subsidiary; and a total of 0.8 billion yen in income taxes.

Since the accounting period for all overseas consolidated subsidiaries runs from January to December, the first half under review for these subsidiaries covers the period from January to June 2018.

Note: Regional subsidiaries overseas pay the amount of royalties commensurate as the cost of sales while the Japanese parent company (the copyright holder) calculates this income as sales. Because consolidated transactions are eliminated, however, these are not included in Japan's sales figures stated above (although included in segment profit (operating profit)).
Further, the above sales figures are "sales to customers," and the inter-segment sales, which are not limited to the above-mentioned royalties, are eliminated as internal transaction sales.
i. Japan: Sales rose $0.5 \%$ year-on-year to 21.5 billion yen and operating profit fell $9.2 \%$ to 1.6 billion yen.

In the product sales business, although regional and suburban consumption trends remained challenging, there was steady growth in flagship stores in metropolitan areas and stores with large numbers of customers from overseas. However, from July, a decline in customer numbers, including overseas visitors, due to such factors as suspension of business in some local stores resulting from the hot weather and from typhoons, earthquakes, and other natural disasters greatly affected sales. In this situation, measures including character awards products to show appreciation for customer support, collaborative products with other companies' characters, and coordination with character cafés proved successful. As a result, same-store sales (based on directly owned stores and directly operated shops within department stores) achieved $99.7 \%$ of the previous year's level. With regard to the future, we are working to increase sales by further strengthening the growing area of e-commerce; creating actual store environments that highlight seasons such as Halloween and Christmas; taking measures to attract customers through store events; further stimulating demand through additional product proposals and promotions aimed at the high gift-giving season; implementing new initiatives for visitors from overseas; and creating new themes.

In the licensing business, product licensing rights sold well including miscellaneous goods focused on a design that includes several Sanrio characters, collaboration with animation content, coordination with Sanrio Puroland, and merchandizing of Mr. Men and Little Miss. However, the weather and natural disasters had a great impact on some of our suppliers, which affected the Company in turn. In enterprise planning, Johnson \& Johnson K.K. baby oil, Kanebo Cosmetics Inc. makeup products, Daiichi Sankyo Healthcare Co., Ltd. skincare products, and others sold steadily. In addition, "happy meal" toys at McDonald's Company (Japan), Ltd. and store purchase promotion campaigns with major drink manufacturers including Suntoryfoods Limited, Asahi Soft Drinks Co., Ltd., and Pokka Sapporo Food \& Beverage Co., Ltd. contributed to earnings. Finally, the start of operation for the Hello Kitty Shinkansen Bullet Train run by the West Japan Railway Company has led to merchandizing of confectionery manufacturers and expanded advertising business with related companies such as Nippon Travel Agency Co., Ltd.

In the theme parks business, at Sanrio Puroland in Tokyo's Tama City, visitor numbers rose $10.5 \%$, or 68,000 , year-on-year to 717,000 . The Marchen Theater's new production, Kawaii Kabuki-Momotaro by the Hello Kitty Troupe, produced in collaboration with Shochiku Co., Ltd. from March 2018, proved a hit. In addition, following on from previous work at the Fairyland Theater, a new musical production with male-only actors called Memory Boys-Store Selling Memories launched in June in collaboration with Nelke Planning Co., Ltd. also contributed to the strong results. Moreover, this summer we transformed the content from last year 's Summer Festival to the Puro Summer Festival, and from September the Puro Halloween Party has proved popular. Furthermore, enterprise planning for welfare agency services performed well and the number of customers from overseas has risen due to such factors as e-ticket sales through overseas agents. As a result of the increase in customer numbers, sales including tickets, products such as souvenirs, and restaurants all increased year-on-year. In addition, sales from events involving "cosplay" and star appearances as well as venue rentals including corporate bargains rose 50\% year-on-year. Operating profit increased, with the rise in sales compensating for the increase in personnel and other expenses incurred from attracting greater numbers of customers and hosting events.

At Harmony Land in Oita Prefecture, measures to impart a sense of coolness during the summer season, night parades, and strengthening of the swimming pool business contributed to visitor numbers but the family group stratum centered on preschool children struggled to grow amid the effects of torrential rain and typhoons in western Japan and the continuing record heatwave, limiting the rise in visitor numbers to $5.7 \%$, or 13,000 year-on-year for a total of 246,000 . For customers visiting from overseas, the group travel plan with charter flights for Taiwanese originally set up for Harmony Land only was established this year for multiple facilities, leading to a year-on-year fall in visitor numbers to Harmony Land of 3,000 people.

In the other business category, delivery of custom-made robots for museum rentals, as humanoid hotel reception guides, and for dentistry training contributed to sales.

Meanwhile, operating profit from domestic business declined year-on-year due to a fall in overseas master license revenues and other factors.
ii. Europe: Sales rose $0.2 \%$ year-on-year to 1.0 billion yen and operating loss stood at 99 million yen, an improvement of 11 million yen.

The sales situation in the major European countries remains severe, with sales in the main licensing categories falling below the previous year's level. In the Near and Middle East, Eastern Europe, and Russia, growth is inadequate as yet despite efforts to cultivate sales. In addition, we are struggling to expand Mr. Men and Little Miss in Asia. In the category of selling, general, and administrative expenses, sales commissions declined, contributing to higher operating profit as a result of canceling an agreement with a sales agency in the UK and switching to direct sales. Although the difficult business situation persists, we plan to implement marketing using YouTubers and other famous influencers, strengthen initiatives through collaborations with famous brands and leading fast fashion names, and enhance the major softline merchandise category.
iii. North America: Sales fell $8.8 \%$ year-on-year to 1.2 billion yen and operating loss stood at 0.5 billion yen, a fall of 48 million yen.

In the United States, income from real estate leasing ceased with the sale of the U.S. subsidiary head office, warehouse and rental facility in San Francisco. Regarding sales, the major categories of apparel and health \& beauty performed at a significantly lower level than the previous year. We will continue to aim for the bottoming out of business results through strengthening mixed characters including hello sanrio, which is also an initiative in the medium-term management plan, "Aggretsuko," a character that started to be streamed at Netflix from April, which is very well received characters other than "Hello Kitty."
iv. Latin America: Sales fell $36.1 \%$ year-on-year to 0.2 billion yen and operating profit fell $82.0 \%$ to 12 million yen.

Sales and profits declined in the Latin American region due to the strong impact of poor economic conditions in the major countries of Mexico, Brazil, Chile, and Peru. In Brazil, health \& beauty and household goods performed well but were unable to compensate for the decline in the core apparel category. In Mexico, the core categories of apparel and household goods performed well but all other categories did poorly. From now on, we will undertake direct licensing transactions with retailers and create character exposure through social networks and space licensing facilities.
v. Asia: Sales rose $3.5 \%$ year-on-year to 4.2 billion yen and operating profit rose $0.1 \%$ to 1.5 billion yen.

In Taiwan, the major product licensing categories of apparel, baby goods, and household goods performed well. Among the characters, popular My Melody contributed to higher sales.

Sales in Hong Kong and Macao continued to perform well. Promotion campaigns with drugstores and other major distributors and initiatives with financial institutions contributed to sales. In Thailand, which achieved high growth in the previous fiscal year, we are engaging in brand control to avoid excessive exposure and sales are stalling. However, in the Philippines and Vietnam, product licensing expanded strongly and supported business results despite the small size of the market.

In South Korea, the health \& beauty and food categories performed well but results fell year-on-year due to factors such as declining special corporate sales including corporate promotions, which performed well the previous year.

In China, the space licensing business performed well. For product licensing, results were driven by strong sales of apparel focused on children's clothing from one of China's largest sports brands. Meanwhile, we are struggling in some areas due to the decline of accessory-related sales arising from stagnation in the jewelry and gold industries and a further decline among major cosmetics-related licensees. To compensate for this, we are focusing on new product development for Gudetama and other characters and cultivating special sales for corporate promotions.

Among characters, the growth of Bad Badtz-Maru, which is popular for apparel development in China, the anime hit Rilu Rilu Fairilu in South Korea, and Cinnamoroll and Little Twin Stars in other regions contributed to raise the composition ratio of characters other than Hello Kitty.

## (2) Explanation of Financial Position

At the end of the first half of the current fiscal year, total assets stood at 95.7 billion yen, a decrease of 2.5 billion yen from the end of the previous fiscal year. The main increase was 1.4 billion yen in investment securities. The main decreases were 1.2 billion yen in cash and deposit, 1.4 billion yen in trade notes and accounts receivable, 0.2 billion yen in buildings and structures, 0.2 billion yen in intangible fixed assets, 0.4 billion yen in deferred tax assets and 0.3 billion yen in investments and other assets.

Liabilities decreased 2.0 billion yen from the end of the previous fiscal year to 43.4 billion yen. The main decreases were 0.3 billion yen in interest-bearing debt (including current portion of corporate bonds to be redeemed), 0.8 billion yen in accrued income taxes and 0.7 billion yen in net defined benefit liability. Net assets decreased 0.4 billion yen from the end of the previous fiscal year to 52.2 billion yen. The main increases were 0.7 billion yen in net unrealized gain on other securities and 0.3 billion yen in remeasurements of defined benefit plans, and the main decrease was 1.8 billion yen in foreign currency translation adjustments. The equity ratio was $54.3 \%$, up 0.9 percentage point from the end of the previous fiscal year.

## (3) Explanation of Consolidated Forecasts and Other Forward-looking Statements

As announced on May 11, 2018, Sanrio started a three-year medium-term management plan "Marketing Innovation Project 2021" in the current fiscal year. We will take various actions in accordance with this plan in order to "become a strategic global company operating a Social Communication Gift Business."

Regarding the results for the first half, although difficult conditions prevail in each region, we aim to meet the first-year and final-year targets for operating profit and are continuing to implement each measure of the medium-term management plan.

Accordingly, regarding the full-year consolidated forecasts announced on May 11, 2018, while operating profit remains unchanged, assessment values have changed for ordinary profit based on non-operating and extraordinary profit/loss performances and for net profit attributable to owners of parent. Nevertheless, we plan to maintain annual dividends of 30 yen, paid out as interim and year-end dividends of 15 yen per share each in line with the initial announcement.
