## 1. Qualitative Information on Quarterly Consolidated Financial Results

### (1) Explanation of Results of Operations

In the first quarter of the current fiscal year (“the period under review”), the Japanese economy remained on a gradual recovery track due to solid corporate earnings and improvement in employment. However, the outlook remains uncertain due to factors such as the effects of the coming consumption tax increase, the impact of developments of the U.S.-China trade issues, an evident slowdown in the Chinese economy, and the Brexit issue.

Additionally, a series of capital investments in the liquid crystal panel industry—a key market for the Helios Techno Group (“the Group”)—continued primarily in China as TV panels became larger, but its momentum remained on a declining trend because the outlook for the future is unclear due to the U.S.-China trade issues.

In this business environment, the Group’s net sales for the period under review decreased 1,777 million yen, or 30.5%, year on year to 4,059 million yen, operating profit decreased 580 million yen, or 93.3%, to 41 million yen, recurring profit decreased 580 million yen, or 92.2%, to 48 million yen, and profit attributable to owners of parent decreased 438 million yen, or 99.1%, to 4 million yen.

Operating results by business segment are described below. Each of the amounts shown includes inter-segment transactions.

#### i) Lamp Business

The Lamp Business reported a segment loss because the expected sales of lamps for the light source units for exposure equipment during the period under review has been postponed to the next quarter and onwards and because we proactively invested in the development of new products.

Consequently, the segment sales for the period under review decreased 20.8% year on year to 612 million yen with a segment loss of 86 million yen (compared with a segment loss of 21 million yen for the same period of the previous fiscal year).

#### ii) Manufacturing Equipment Business

The Manufacturing Equipment Business remained strong in sales as we successfully delivered mainly light source units for exposure equipment as planned. It is noted that we delivered alignment layer manufacturing equipment used for large flat-panel displays during the same period of the previous fiscal year.

Consequently, the segment sales for the period under review decreased 44.3% year on year to 2,122 million yen with a segment profit of 212 million yen, down 69.5% year on year.

#### iii) Human Resource Service Business

The Human Resource Service Business includes the temporary staffing for engineers, design subcontracting, and temporary staffing to the manufacturing sector. We have achieved stable performance for temporary staffing for engineers and design subcontracting by educating human resources to improve their skills and creating an environment for engineers to grow in response to customers’ needs. In the temporary staffing to the manufacturing sector, we have achieved good performance thanks to the continuously increasing number of staff dispatched to both existing and new customers. We are also proactively making investments for securing human resources for staffing.

Consequently, the segment sales for the period under review increased 5.3% year on year to 1,344 million yen with a segment profit of 52 million yen, down 26.4% year on year.

## (2) Explanation of Financial Position

### Assets

Current assets decreased 1,513 million yen from the end of the previous fiscal year to 13,430 million yen. This was mainly due to a 547 million yen decrease in cash and deposits with banks, a 924 million yen decrease in notes and accounts receivable, and a 283 million yen decrease in electronically recorded monetary claims – operating, while there was a 113 million yen increase in income taxes receivable included in “Others” of the current assets section.

Fixed assets decreased 126 million yen from the end of the previous fiscal year to 3,137 million yen. This was mainly due to a 96 million yen decrease in investment securities included in “Others” of the investments and other assets section.

As a result, total assets decreased 1,639 million yen, or 9.0%, from the end of the previous fiscal year to 16,568 million yen.

### Liabilities

Current liabilities decreased 997 million yen from the end of the previous fiscal year to 4,196 million yen. This was mainly due to a 310 million yen decrease in notes and accounts payable, a 261 million yen decrease in accrued bonuses, and a 420 million yen decrease in advances received.

Long-term liabilities decreased 35 million yen from the end of the previous fiscal year to 342 million yen. This was mainly due to a 25 million yen decrease in long-term borrowings.

As a result, total liabilities decreased 1,033 million yen, or 18.5%, from the end of the previous fiscal year to 4,539 million yen.

### Net assets

Net assets decreased 605 million yen, or 4.8%, from the end of the previous fiscal year to 12,028 million yen. This was mainly due to the payment of dividends from surplus of 542 million yen.

As a result, the equity ratio rose 3.2 percentage points from the end of the previous fiscal year to 72.6% at the end of the period under review mainly because both assets and liabilities decreased as stated above.
