### **Summary of Financial Results for 1H FY3/20**

### **Overview of Financial Results**

Accounting Period of 2Q FY3/20

JCU (non-consolidated): July 1 to September 30

Overseas subsidiaries: April 1 to June 30

#### For electronic components

- Although there were clear signs of recovery toward commercialization of the 5G model, sales of smartphones remained sluggish due to consumers' unwilling to buy current models.
- Demand for chemicals for package substrates declined in South Korea due to the sluggish semiconductor market and ongoing inventory adjustment.
- Sales were weak compared with a year earlier.

#### For automotive components

- In Japan, production volumes were low at manufacturers of automotive parts.
- Overseas, although an order from a new customer was received in China, production in the country's automobile industry was sluggish because of US-China trade friction. Sales of chemicals were generally unchanged in Japan and overseas.

#### **Machine Business**

■ A big decrease in sales caused by a downturn in large projects and delays at projects under way.

#### Termination Shareholder Benefit Program

We have implemented a shareholder benefit program with the aim of enhancing understanding of our business and encouraging more people to the Company shares over the long term. However, we have decided that it would be appropriate to directly return profits through dividends in light of the opinions of investors and fair return of profits, and have resolved to abolish the current shareholder benefit program.

For the year-end dividend for FY3/20, we will allocate to dividends the financial sources reserved for the shareholder benefit program. We position the return of profits to shareholders as a priority management issue and continues to improve its corporate value. We sincerely ask for the understanding of shareholders with regard to this revision.

We will continue to make investments for sustainable growth while securing liquidity on hand and maintaining stable financial base. Our basic policy is to pay dividends with a target payout ratio of 25% with an aim for stable dividend growth.
