## 1. Qualitative Information on Quarterly Consolidated Financial Performance

## (1) Explanation of Results of Operations

During the first half of the fiscal year under review, in Japan the theme parks performed well, especially Sanrio Puroland in Tama City, Tokyo. Additionally, in the domestic product sales business, factors such as the Sanrio Character Awards and the success of hit products in attracting customers enlarged the customer age group, leading to increased revenue. Meanwhile, revenue declined overseas due to a fall in sales to top licensees in China, the impact on merchandise and license sales of a drop in store sales from demonstrations in Hong Kong, and a reduction in promotional sales in Southeast Asia including Hong Kong. In Europe, the licensing business remains in a difficult situation and the business recovery is taking longer than expected. As a result of these declines in overseas license income, sales fell only slightly, declining $2.2 \%$ year-on-year to 27.6 billion yen, while operating profit fell $36.3 \%$ to 1.3 billion yen due to an increase in selling, general, and administrative expenses. Ordinary profit fell $25.3 \%$ to 2.0 billion yen, mainly due to accounting gain on investments in partnership as non-operating profit. Net profit attributable to owners of parent fell $78.5 \%$ to 0.3 billion yen after accounting for extraordinary gains of 0.2 billion yen including gains on sales of investment securities; extraordinary losses including 0.7 billion yen loss related to a competition-law surcharge imposed by the European Commission and a loss on valuation of investment securities of 0.3 billion yen; and total income taxes of 0.5 billion yen.

Since the accounting period for all overseas consolidated subsidiaries runs from January to December, the first half under review for these subsidiaries covers the period from January to June 2019.

Note: Regional subsidiaries overseas pay the amount of royalties commensurate as the cost of sales while the Japanese parent company (the copyright holder) calculates this income as sales. Because consolidated transactions are eliminated, however, these are not included in Japan's sales figures stated above (although included in segment profit (operating profit)).
Further, the above sales figures are "sales to customers," and the inter-segment sales, which are not limited to the above-mentioned royalties, are eliminated as internal transaction sales.
i. Japan: Sales rose $1.8 \%$ year-on-year to 21.9 billion yen and operating profit fell $26.6 \%$ to 1.1 billion yen.

In the product sales business, products for several Sanrio characters (including PET bottle series and pouches) and lucky draws were supported by a customer base with a wide age range even after July. Furthermore, with the launch of the Enjoy Idol series of products, the Company has managed to incorporate a new customer base, the idol fans, for the first time. Customer numbers have risen to $117.0 \%$ of the figure for the same period of the previous year, and same-store sales (based on directly owned stores and directly operated shops within department stores) exceeded the previous year's level, reaching $110.6 \%$. Department stores also opened shops for a limited period to commemorate the 45th anniversary of Hello Kitty and sales promotion initiatives were well received, leading to still greater recognition. Moreover, in mid-November, a directly managed store will open to provide entertainment at Minami-machida Grandberry Park.

Sales in the wholesale division rose $5.5 \%$ year-on-year, with strong sales to partner Aeon and Don Quijote and to e-commerce partner Amazon. Going forward, we will strengthen sales to acquire promising channels that will become the next pillar following on from existing suppliers.

In the third quarter, in the run-up to the year-end shopping season (the biggest season of the year), the Company will strengthen sales for continuing trending products for several Sanrio characters as well as warmth-related items and year-end and Christmas gift products that trended strongly last year, linking them to promotion initiatives and leading to an increase in sales.

In the licensing business, for product licensing, unseasonable weather had an adverse effect on sales of all apparel-related items, but a design that includes several Sanrio characters, collaborative planning with other companies' anime content, and new collaboration with major food and drink manufacturers proved popular. In enterprise planning, a design that includes several Sanrio characters used on the Pasmo IC card ticket for foreign visitors to Japan, original 7-Eleven lucky draws, and on other products contributed significantly to sales. Moreover, in an initiative with Shiseido Company, Limited, Hello Kitty character products created in collaboration with photographer and film director Mika Ninagawa were provided in Shiseido Parlour and developed with cosmetics. The Skylark Group's Cinnamoroll campaign and the 3M Japan Group's kitchen sponge campaign also proved popular.

In the theme parks business, at Sanrio Puroland in Tokyo's Tama City, visitor numbers rose $8.2 \%$, or 58,000 , year-on-year to 775,000 . The effect of using social media to disseminate information aimed at young women was the primary reason for the rise in numbers. Additional use of sales of tickets at the door increased with coordinated discounts (applicable when visiting for events in specific outfits), student pass discounts, pair discounts, and tie-up discounts with companies. Another factor was increased theme-park recognition resulting from TV coverage. The higher visitor numbers led to a double-digit increase in ticket sales, product sales such as souvenirs, and restaurant sales year-on-year. Among the products, wearable items such as headbands proved especially popular. The operating profit increased as higher earnings compensated for the rise in expenses, including those for event-related personnel and amortization for renovating Restaurant Yakata. At Harmony Land in Oita Prefecture, visitor numbers rose $0.8 \%$, or nearly 2,000 , year-on-year to 248,000 . In the first quarter, visitor numbers increased due to long holidays and large-scale member plans. In the second quarter, individual customer numbers exceeded those of the previous year due to various measures such as plan and tie-up discounts, and the number of foreign visitors to Japan also grew strongly. However, in July, the rainy season ended two weeks later than it had the previous year, and in August prolonged rainfall in the latter half of the month led to one more week of rain than in the previous year. In addition, typhoons struck on busy periods such as the Bon Festival and the autumnal equinox holidays in September, and customer numbers were greatly impacted by rain throughout the period, resulting in lower-than-expected figures. Sales and profits both increased due to strong sales including products and souvenirs in line with the introduction of Wish Me Mel.
ii. Europe: Sales fell $30.5 \%$ year-on-year to 0.7 billion yen and operating loss stood at 0.2 billion yen, a fall of 0.1 billion yen.

In Europe, despite seeing a recovery in Italy, sales and profits declined significantly, due in part to the impact of poor sales in Germany and France and a recorded sales shortfall in meeting the minimum guarantee in the same period of the previous year.
iii. North America: Sales fell 8.5\% year-on-year to 1.1 billion yen and operating loss stood at 0.4 billion yen, an improvement of 61 million yen.

In terms of licensing, the core apparel and toy categories struggled, but brand collaborations with Converse and Herschel and the development of the Crème shop in cosmetic chain stores contributed to sales. For product sales, store sales including the e-commerce business performed steadily, but a decline in wholesale sales to Latin America had an adverse effect.
iv. Latin America: Sales fell $8.1 \%$ year-on-year to 0.2 billion yen and operating profit fell $1.8 \%$ to 12 million yen.
In South America, sales and profits rose on a local currency basis but the weakness of the Brazilian real had a significant impact. Sandals collaborations produced strong results in Brazil. In Mexico, the existing trade in apparel and home appliances continued to struggle but the health and beauty category performed well due to promoting initiatives with top licensees.
v. Asia: Sales fell $13.2 \%$ year-on-year to 3.6 billion yen and operating profit fell $15.7 \%$ to 1.3 billion yen.

In the Hong Kong and Macao markets, sales from top licensees declined due to the significant impact of factors such as U.S.-China trade friction and demonstrations that adversely affected consumption. In the Thai market, sales fell due to a reduction in large-scale corporate campaigns. Meanwhile, sales in the Philippines and Indonesia increased significantly despite the still-small market size.
In Taiwan, in addition to a temporary recording of theme-park related sales in the previous fiscal year, sales struggled in each category, including a decline in corporate campaigns.
In South Korea, sales and profits fell due to the significant impact of the decline in the popular anime character Rilu Rilu Fairilu.

In China, the number of accessories-related top licensees is declining due to continued sluggish growth in the jewelry market, and top licensees are also struggling with sales acquisitions. The number of new licensees continued to grow steadily and corporate promotions also increased, but these did not cover a downturn among top licensees. The depreciation of the renminbi also contributed to the decline in sales and profits. In terms of character diversification, Gudetama has made great strides through adoption for corporate promotion and Kero Kero Keroppi has also grown through business with Anta Kids.

## (2) Explanation of Financial Position

At the end of the first half of the current fiscal year, total assets stood at 97.2 billion yen, an increase of 2.0 billion yen from the end of the previous fiscal year. The main increase was 3.7 billion yen in cash and deposit. The main decreases were 1.0 billion yen in trade notes and accounts receivable and 0.9 billion yen in investments and other assets.

Liabilities increased 3.6 billion yen from the end of the previous fiscal year to 46.4 billion yen. The main increases were 3.9 billion yen in interest-bearing debt (including current portion of corporate bonds to be redeemed) and 0.7 billion in other long-term liabilities. The main decrease was 0.7 billion yen in retirement benefit liability. Net assets decreased 1.6 billion yen from the end of the previous fiscal year to 50.7 billion yen. The main decreases were 0.9 billion yen in retained earnings due to dividend payment and 1.1 billion yen in foreign currency translation adjustments. The equity ratio was $51.9 \%$, down 2.8 percentage point from the end of the previous fiscal year.

## (3) Explanation of Consolidated Forecasts and Other Forward-looking Statements

The consolidated forecasts for the full fiscal year have changed from those announced on July 31, 2019. Please refer to the "Notice Regarding Differences Between Results Forecasts and Results for the First Half of the Fiscal Year and Revision to Full-Year Results Forecasts" announced today. Regarding the dividend forecast for the current fiscal year, as previously announced, we will maintain the dividend of 15 yen in the second quarter and 20 yen at the end of the fiscal year (including a commemorative dividend of 5 yen) for an annual total of 35 yen.

## (3) Notes to Quarterly Consolidated Financial Statements

## Going Concern Assumption

Not applicable.

## Significant Changes in Shareholders' Equity

Not applicable.

## Changes in Accounting Policies

Subsidiaries applying International Financial Reporting Standards (IFRS) adopted IFRS 16 "leases" from the first quarter of the current fiscal year. Accordingly, the lessee, in principle, has determined to record all leases as assets and liabilities on the balance sheet. For the application of IFRS 16, a transitional approach has been adopted that recognizes the cumulative effect of applying this standard from the commencement date.

As a result, tangible fixed assets at the end of the second quarter of the current fiscal year increased 388 million yen, other current liabilities increased 148 million yen and other long-term liabilities increased 242 million yen. The effect of this change on earnings in the first six months of the current fiscal year is insignificant.

## Segment and Other Information

I. First six months of FY2018 (Apr. 1, 2018 - Sep. 30, 2018)

1. Information related to sales and profit or loss for each reportable segment
(Millions of yen)

Notes: 1. The minus 431 million yen adjustment to segment profit (loss) is the sum of eliminations for inter-segment transactions and unallocated operating expenses that are mostly general and administrative expenses that cannot be assigned to any particular segment.
2. Segment profit (loss) is adjusted to be consistent with operating profit shown on the consolidated income statements.
2. Information related to impairment losses on fixed assets, goodwill, etc. for each reportable segment Detailed explanations are omitted due to immateriality of the amount.
