

## Financial Results Briefing Material for the Third Quarter of the Fiscal Year Ending March 2021

## JCU CORPORATION

TSE First Section (Stock Code: 4975)

February 3, 2021

### Summary of Consolidated Financial Results for 3Q FY3/21

#### **Overview of Financial Results**

Accounting Period of 3Q FY3/21 JCU (non-consolidated): April 1 to December 31 Overseas subsidiaries: January 1 to September 30

#### For electronic components

- China: Despite the decreased number of smartphones sold, business remained solid with the generally unchanged demand for chemicals for PWBs for antennas used in the base stations for the 5G mobile communication system and PWBs for surveillance cameras compliant with 5G.
- Taiwan: Business remained strong with the increased demand for chemicals for PWBs for high-performance electronic devices and semiconductor package substrates for servers, along with the start of mass production for the launch of new smartphone models.
- Korea: Demand for chemicals declined slightly because an increase in demand for semiconductor package substrates was not large enough to offset the decline up to the second quarter.

#### For automotive components

- Japan: Demand for chemicals declined because a recovery trend in the domestic automotive industry was not strong enough to offset the decline up to the second quarter.
- Overseas: Although production in automotive component manufacturers was on a recovery track in China, demand for chemicals remained stagnant due to adjustment to automotive component inventory.

#### **Machine Business**

The amount of orders received decreased substantially due to lower demand in capital investment by automotive component manufacturers.
