1. Qualitative Information on Quarterly Consolidated Financial Performance

(1) Explanation of Results of Operations

In the first nine months of the current fiscal year, the manufacturing sector business sentiment (DI) at large companies increased 15 points from the December 2020 survey to plus 5 in the Bank of Japan *Tankan* announced on March 31, 2021. This index had fallen to negative 34 in June 2020, the same level as after the Lehman Shock, due to the spread of the COVID-19 pandemic, but has continued to improve since then, and has now recovered to the pre-pandemic level of September 2019. The economy improved for the third consecutive quarter as exports and production expanded due to the recovery in overseas economies such as the U.S. and China. On the other hand, non-manufacturing sector business sentiment at large companies improved marginally by 4 points to negative 1 indicating that economic recovery from the COVID-19 pandemic is increasingly polarized.

Japan's unemployment rate in February 2021 was 2.9%, unchanged from January, and the February jobs-to-applicants ratio was down 0.01 point from January to 1.09.

In Thailand, which is a major market for Hirayama Holdings, the manufacturing production index stopped falling in the second quarter of 2020, when the index was down 20.4% from one year earlier, and subsequently recovered to a decrease of 1.6% from the prior-year level in the fourth quarter.

Sales in the first nine months at the Hirayama Group were largely in line with the plan mainly for three reasons. First is the higher orders and sales due to an increase in our customer's production, mainly in the automotive sector. Second is the strong performance of the medical devices and food categories, which offset weakness in the office equipment, and retail and service categories. Third is the start of a recovery in manufacturing activity outside Japan. Earnings in the first nine months were higher than planned. This is attributable to Genba Kaizen (improving how work is performed) at outsourcing job sites, the receipt of orders with high rates and the utilization of DX and RPA to efficiently use selling, general and administrative expenses.

In the first nine months of the current fiscal year, the recovery of the output of customers was just beginning in the first quarter. As a result, net sales decreased 4.4% year-on-year to 16,697 million yen and operating profit decreased 3.4% to 367 million yen. Ordinary profit increased 8.3% to 455 million yen due to subsidy income of 65 million yen included in non-operating income. Profit attributable to owners of parent increased 109.4% year-on-year to 305 million yen because of extraordinary income of 44 million yen for a consumption taxes differential and of 36 million yen for gain on forgiveness of debts, and income taxes of 228 million yen.

Results by business segment were as follows.

1) In-sourcing & temp staffing services

Orders remained firm during the first nine months, primarily in the machinery and logistics sectors while there were lower orders in the retail and service sectors. Orders remained strong in the medical devices and food categories. Earnings increased due to our efforts to improve profitability by continuing to improve how work is performed, as well as efficient use of personnel recruitment and training expenses while maintaining employment in preparation for the next phase of growth in anticipation of recovery in orders.

On the recruiting front, the numbers of both new graduates and of mid-career hires were higher than in the same period of the previous fiscal year as we were able to maintain steady rates of hiring.

Segment sales in the first nine months decreased 1.3% year-on-year to 13,876 million yen and segment profit increased 12.1% to 1,168 million yen.

2) Engineer placement services

In the engineer placement services segment, there is still a sense of caution about the future of the economy due to concerns over trade friction between the U.S. and China, the declaration of a state of emergency and the fact that the spread of the COVID-19 pandemic has not abated. As a result, more of our client companies are taking a cautious approach to increasing the number of engineers. Demand for IT-related engineers has been steady, but there have

been some instances of decline in demand for external workers from some of our major customers, especially in the automotive and other transport equipment sectors.

As in the previous fiscal year, the Hirayama Group used training activities that benefit from group synergies in order to provide customers with added value. As a result, contracts were renewed for most of the engineers who were already placed at client companies.

On the other hand, in human resources recruitment, the placement of personnel from overseas partner universities had been delayed due to entry restrictions in the previous fiscal year. Although these entry restrictions have been intermittently lifted, only a few placements were made. Moreover, since the year before last, we have been working on a training program for people with no experience and on a program to convert personnel with no technical background from companies in the Hirayama Group into persons who can fill engineering positions, as the number of applications from inexperienced personnel and foreign nationals in Japan has been on the increase.

Moving ahead, we will continue to strengthen the recruitment of new employees, mainly for high value-added human resources. Simultaneously, we will continue to focus on ensuring the health of our employees by providing mental health care support by career counsellors and strive to reduce turnover of engineers who are the source of our growth.

Segment sales decreased 3.3% year-on-year to 1,094 million yen and segment profit decreased 29.0% to 49 million yen due to a temporary increase in training costs.

3) Overseas operations

In Thailand, the primary location of operations outside Japan, the manufacturing production index was down from one year earlier by 6.4% in the first quarter of 2020, 20.0% in the second quarter, 8.5% in the third quarter and 1.6% in the fourth quarter. Major reasons for these declines are weak exports because of the appreciation of the baht and the effects of the COVID-19 pandemic on economic activities. According to the Federation of Thai Industries, the magnitude of the downturn in automobile production has been declining since July 2020. Production was 11.9% higher than one year earlier in November and 10.7% higher in March 2021. The number of temporary employees of Hirayama Group in Thailand as of March 2021 recovered to 95% of the level recorded one year earlier.

To help manufacturers improve efficiency in many ways, the Hirayama Group are creating proposals for a foreign worker MOU service, mainly in Myanmar, that locates people who are looking for long-term employment. A labor management service for foreign workers is another way we support client companies. These services have been temporarily suspended because of the severe impact of COVID-19 and the situation in Myanmar. These services will be restarted when the business climate improves.

Consequently, in the first nine months of the current fiscal year, we were still in the process of recovering from the effects of the decline in the output at customers caused by the spread of the COVID-19 pandemic. Segment sales decreased 34.5% year-on-year to 1,051 million yen and the segment loss was 58 million yen, compared with profit of 7 million yen one year earlier.

Note: There is a three-month delay in the disclosure of results of operations in the overseas operations segment. The sales and earnings reported for the first nine months of the current fiscal year are for overseas operations in the period from April to December 2020.

4) Others

In the Others business segment, while the Genba Kaizen (improving how work is performed) consulting service and study tours to Japan from other countries were still severely affected by the spread of the COVID-19 pandemic, the Group actively developed and promoted paid web-based seminars in cooperation with major telecommunications companies and human resource education institutions in developing nations. We have already conducted seminars in a wide range of countries including India, Pakistan, Bangladesh, Singapore, China, Brazil, UAE, and Georgia, and are engaged in expanding this business globally. We have expanded online activities to include study tours in Japan

for people in other countries. Online formats are used for field trips to factories, discussions with company presidents and many other activities. The response has been very positive. Furthermore, new businesses, such as IT staffing, medical interpreter training, and IMOC (inventory management operation center) related businesses, are now steadily starting to contribute to sales as customer development progresses. However, the employment management support business for foreign nationals and the IT staffing business are both taking time to become profitable due to the restrictions on the entry of foreign nationals into Japan. In addition, the sales for the Genba Kaizen visiting consulting business, which has a high profit margin, temporarily declined due to the restrictions on travel to foreign countries. Consequently, the operating environment for the business remained challenging in the first nine months of the current fiscal year.

As the activities in this category are still in an early stage, segment sales increased 0.3% year-on-year to 674 million yen and the segment loss was 20 million yen, compared with profit of 68 million yen one year earlier.

(2) Explanation of Financial Position

Total assets increased 409 million yen from the end of the previous fiscal year to 7,782 million yen at the end of the third quarter of the current fiscal year. This was mainly due to increases in cash and deposits of 101 million yen and notes and accounts receivable-other of 261 million yen.

Total liabilities increased 218 million yen to 4,703 million yen. This was mainly attributable to an increase in accrued consumption taxes of 433 million yen, which was partially offset by a decrease in long-term borrowings of 202 million yen.

Net assets increased 191 million yen to 3,079 million yen. The main reason was an increase in retained earnings of 206 million yen.

(3) Explanation of Consolidated Earnings Forecast and Other Forward-looking Statements

First nine months sales were 71.6% of the forecast for the fiscal year ending June 2021, announced on August 14, 2020, and the percentage was 91.9% for operating profit, 113.9% for ordinary profit and 101.8% for profit attributable to owners of parent, all of which are generally above the forecast. An announcement will be made promptly if there is a need to revise the forecast in light of performance trends.

* Forecasts are based on information currently available to Hirayama Holdings. Actual performance may differ from these forecasts for a number of reasons.
