## Sales and Operating Profit by Segment

In the cosmetics segment, sales and earnings increased and operating margin remained above $10 \%$ as strong sales in Japan and Tarte more than offset the impact of lower DECORTÉ sales in China.
$>$ In the cosmetaries segment, KOSÉ Cosmeport and VISÉE, FASIO and other makeup brands were the primary drivers of sales growth. Earnings were up sharply, including a delay in the recognition of some SG\&A expenses.

[^2]2024 Sales Plan (Regional/ Business Segment/ Major Group Companies)

| Region (YoY change) | 2023 sales (\%) | 2024 sales plan (\%) | 2024 outlook |
| :---: | :---: | :---: | :---: |
| Japan | +16.4\% |  | The post-pandemic recovery in demand has ended but the economy is expected to continue recovering slowly. Economic growth may slow as inflation reduces consumer spending growth and due to slower overseas economic growth and Japan's labor shortage. |
| China (excluding TR) | -25.1\% | +5\% | Consumer spending is unlikely to recover soon due to the prolonged real estate market slump and rising unemployment. |
| China/South Korea TR | -59.8\% | +24\% | China: Expecting a challenge at the beginning of 2024 as high distribution channel inventories continue to hold down purchases by travel retailers. Forecast a slow and moderate recovery in shipments as inventories return to normal and consumer spending recovers. South Korea: In the travel retail sector, more time will be needed to return distributor inventories to normal because the number of Chinese tourists is not increasing. |
| Overseas (Tarte) | +27.7\% | -3\% | The negative effects of high interest rates in 2023 are likely to slow the economy but the labor market and consumer spending are expected to remain strong. Forecast a slow recovery as a recession will be avoided. |

- In the cosmetics segment, sales in the high prestige category are expected to grow, driven by DECORTÉ. Sales in the prestige category are expected to perform well in Japan but decline overseas. A solid performance is also expected in the cosmetaries segment.

| Segment (YoY change) | 2023 sales (\%) | 2024 sales plan (\%) |

$>$ A steady sales growth in all categories are expected in Japan. Overseas, sluggish sales in China and South Korea will continue, but a slow and moderate recovery is expected in China, especially in the travel retail segment. Tarte (U.S. and Europe) is expected to perform steadily, but its yen-based sales will decrease due to the strong yen assumption.

In the KOSÉ Sustainability Plan, some targets for activities involving people and society have been revised upward and, to reinforce activities to protect the environment, new and more specific targets were added. The goal for CO2 emissions is net zero by 2050. Another goal is plastic container and packaging designs that contribute to sustainability to be achieved by 2030.

A biomass plastic is used for the SEKKISEI BRIGHTENING ESSENCE LOTION (launched on March 1) container. To lower the amount of plastic required, the amount of resin in the container was reduced and there is no wrapping film. These steps also reduced CO 2 emissions associated with production of the containers.
